Collaborate on Academic Plans with Students

Collaborate on a shared academic planning canvas, monitor adjustments, and communicate directly with students to align choices with advisor recommendations.

Reveal Barriers to On-Time Completion

Identify barriers to on-time completion by receiving alerts for issues like duplicate courses, missing prerequisites or corequisites, or courses not typically offered in the planned term.

View Holistic Course Histories

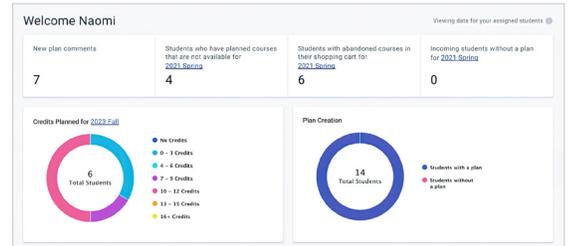

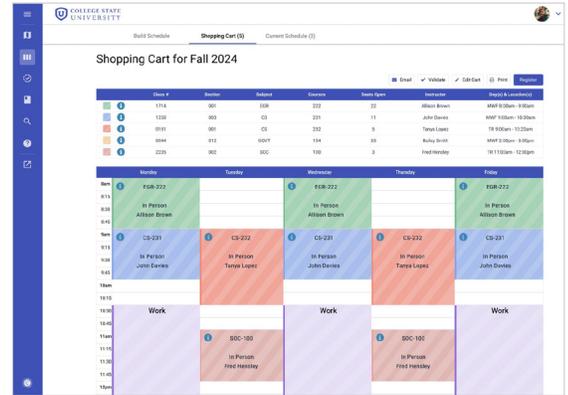

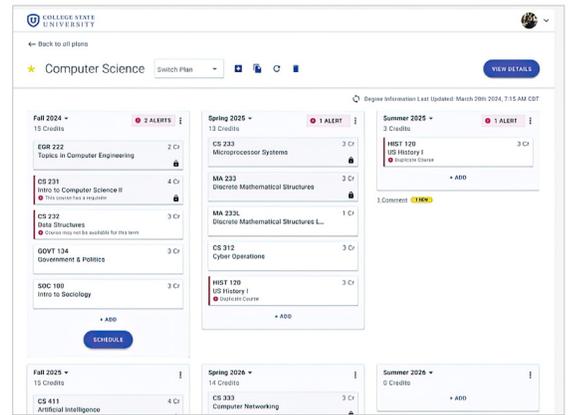

Track graduation progress with a clear view of completed, transferred, and remaining course requirements, multiple plan options, and the ability to add non-course items.

Use Plans to Auto-Generate Student Schedules

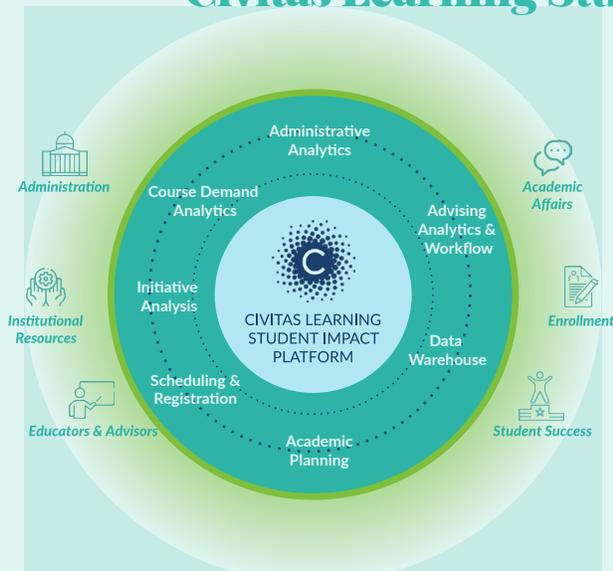

Auto-generate all potential schedules and compare schedule options based on academic plans, breaks, and preferences within the same user experience.

Proactively Engage Based on Student Planning & Scheduling Behaviors

Guide students who need help with registration throughout the term, like first-term students without an academic plan or students who've built a schedule but haven't registered.

Civitas Learning Student Impact Platform

Academic Planning & Student Scheduling

is part of the flexible Civitas Learning Student Impact Platform. A clear roadmap helps students know which courses are required to achieve their academic goals. Students can collaborate with advisors to create customized academic plans that support their on-time graduation and generate schedules that fit their needs. When used as part of the full platform, institutional leaders, enrollment teams, and student success teams can optimize the course schedule planning process and prescribe personalized interventions to create a comprehensive approach to supporting persistence and completion.
